

Softub® Hydromate® System

The Brains Behind the Beauty

Your choice of LeatherTex™ or SynTex™ exterior. Each is made from a marine grade vinyl for superior weather resistance and durability.

State-of-the-art molded foam shell for thermal and acoustical efficiency.

Stainless steel heat exchanger transfers waste heat from the motor to the water, warming it to your set, desired temperature.

10 foot power cord allows placement of your Softub® in almost any location. Plugs in to any isolated or dedicated 115 volt outlet.

Cord-mounted Ground Fault Circuit Interrupter (GFCI) for electrical safety.

Incorporates Softub's Smart Chip™ that monitors electricity and will shut off the tub automatically to protect your investment. It will automatically restart the tub when the voltage returns to a normal level.

Precise electronic digital thermostat to maintain the desired temperature, 24 hours a day.

Multi colored LED lighting connection, provides 10 different lighting effects.

Simple Connect System™ allows the tub and HydroMate® to simply and easily be connected. The dual o-ring seal system ensures years of trouble free use.

The Softub® pump quietly supplies unmatched efficiency, both providing superior hydrotherapy while heating the water.

(It's the strong but silent type!)

Common Cents!

For their power and features, Softub® spas are remarkably efficient to operate. In a climate with an average 60° temperature, the typical Softub requires less than 3kw hours of electricity per day to stay 102° and ready to use. At 13¢ per kw hour, that would be less than \$15.00 per month!*

At the heart of every Softub® is the Hydromate® power system. It delivers hydrojet power and heated water to your Softub®. Designed and built to meet or exceed all appropriate and applicable safety standards. Each Softub® is proudly handcrafted in the USA.

*Individual costs will vary with climate, size of Softub®, use & local electrical rates. These statements are based on a Legend 220. Rev. 2019
